#skating

Our company's skaters are former national athletes without exception in ice dancing, figure- and synchronised skating, who were amongst the best in their field and category. They are multiple Hungarian and international champions, and several members of our team are also successful at Grand Prix competitions, European and World Championships. As a sequel of their skating career after the competitions they appeared in the most famous shows of the world such as Stars on Ice, Kings on Ice or Holiday on Ice.

#freestyle

Incredible characters and unbelievable phenomenon. This is how we could briefly characterize the first Hungarian freestyle skating team, who debuts to show their skills first at our company. Their impressive act is focused on extreme tricks, but elements of figure skating also appear. Modern freestyle sports are the greatest influence on their art. What we can certainly expect to see from them are fantastic jumps, diverse elements, and frenetic energy.

#artpole

Artpole is a performing art, a combination of dance and acrobatics. It contains dance elements mixed with acrobatic acts, using a vertical pole. While in club life artpole performers provide a narrowly focused experience without any acrobatic elements, in the world of performing arts, such as in our show, the emphasis is on the athletic nature and artistic values of pole dancing.

#breakdance

Inserting breakdance into what is far from its usual environment lends a special flavor to our shows. It is important to bear in mind that compared to traditional breakdancing, spinning on one's head on ice and performing various acrobatic movements require much greater technical skills, stamina, and training. Our dancer has been practicing breakdancing for more than ten years, with notable results at several prestigious competitions. After joining our company, all his special acts have been adapted to ice. The extreme combination of breakdance and ice guarantees a magnificent and peculiar performance.

#fire & fireworks act

Dance, figure skating, and juggling. Our fire dancers create an exquisite and breathtaking performance by combining these three art forms. The contradictory sight of freezing ice and flaming props combined with the spectacular show of our dancers never fail to fascinate the audience. Our artists use various tools to color their act such as burning fans and sticks as well as rolling fireballs (poi). In addition to a captivating performance, safety is of paramount importance to us. We possess fire extinguishing equipment in order to protect our artists, the audience, and the environment. For orders of fire acts a suitable venue and conditions are absolutely necessary.
